## Maximize Existing Data Sources and Eliminate Redundancies

### **ONCOLENS TRANSFORMS THE WAY YOU THINK ABOUT EMR INTEGRATION**

OncoLens delivers a *single, comprehensive view of the cancer patient* that clinicians can understand and action from across disciplines. We do this in a way that:

- Reduces clinician burnout
- Enables research and discussion of genomic profiles and precision medicine-based treatment options
- Creates a streamlined, consolidated, and multi-level view into the patient
- Provides a pathway to the kind of communication and knowledge sharing that drives to better patient outcomes

OncoLens not only eliminates many of the challenges created by EMRs, but we enhance the EMR experience by consolidating data, eliminating dual entry, finding and extracting critical information, and creating a longitudinal view of the patient that can be shared across clinical team members on multiple EMRs across multiple networks.

### **ONCOLENS INTEGRATES WITH ALL MAJOR ONC CERTIFIED EMRS**

*In as little as thirteen weeks, we can integrate directly into your EMR.* We support integration with the major ONC Certified EMRs, including EPIC, Cerner, OncoEMR, athenahealth, and more.

OncoLens enhances the EMR through an integration approach that:

- Auto-populates case data directly from the EMR into OncoLens, saving time and eliminating human error
- Supports optional bi-directional data flow
- Absorbs structured and unstructured data from your EMRs
- Collates data on the same patient from multiple health systems
- Extracts key structured fields like staging, treatments, and events using OncoLens' enhanced natural language processing capabilities
- Enables analysis of quality metrics utilizing EMR data

#### **RAPID INTEGRATION TO AMPLIFY THE VALUE OF YOUR DATA**

*With complete integration between OncoLens and your EMR, you amplify the value of your data so that it can be used for focused multi-disciplinary discussion (synchronous and asynchronous) and build a longitudinal view of the patient for all care team members.*

#### **READY TO TAKE THE NEXT STEP IN INTEGRATION? LET US KNOW.**
